VIPRE®

VIPRE Edge Defence Security Solution

Powerful Protection for Your Organisation

EMAIL IS THE LEADING CAUSE OF SECURITY THREATS to businesses[1]. From malicious attacks, such as spam, phishing, and spoofing, to misaddressed recipients or employee error, email can be an omnipresent threat to any and every business.

That's why VIPRE Security has created **VIPRE Edge Defence**. Capable of blocking most malicious email attacks—even advanced zero-day threats—Edge Defence provides world-class training through simulated scenarios to help your employees recognise phishing and other assaults. And with customisable rules for outbound email, you can ensure that sensitive information doesn't fall into the wrong hands.

EDGE DEFENCE SERVICES:

Security Awareness Training
Education to enhance your employees' security knowledge when faced with evolving cyber threats, 85% of which result from phishing and business e-mail compromise [2]

Data Loss Prevention
Avoid misaddressed emails and reduce employee error by scanning and confirming external recipients and email attachments in Microsoft Outlook & OWA

Simplified Support
A single vendor provides one point of contact for account management, billing, technical support, and administrative assistance for a seamless experience

Email Cloud
Safeguards businesses against attacks perpetrated through email, the most common threat vector. Defends users against the newest, most sophisticated strains of malware, weaponised attachments, and phishing techniques that evade traditional detection. Email Cloud also provides 90 days of always-on email continuity

Email Encryption
Send email safely, and without risk of snooping, to any recipient with full end-to-end email encryption

Phishing Protection
Guard end-users from bad links by rewriting URLs, implementing ransomware filters, and adding customisable warnings to alert users

Attachment Sandboxing
Evaluate unknown attachments for potentially malicious behaviour in a virtual environment that applies machine-learning models to real-time employee activity

VIPRE IN NUMBERS

20+
years of malware protection and cyber security

1M+
unique malware samples processed daily

10M+
email boxes protected

KEY BUSINESS BENEFITS

✔ Build a smarter, safer workforce prepared to recognise online threats and cyber attacks

✔ Protect your organisation's sensitive data by encrypting, scanning, and validating email recipients

✔ Isolate malicious activity and unapproved downloads before they can affect your organisation

✔ Block the leading cause of ransomware delivery by automatically scanning email links

✔ Reduce business-threatening downtime due to malware, phishing, and spam attacks via email

✔ Streamline security operations with one touchpoint for technical and billing administration

As your company grows, managing a multitude of security platforms can become daunting—simplify your solution and provide truly effective protection with **VIPRE Edge Defence.**

"VIPRE HAS DONE EVERYTHING THAT WE HAVE NEEDED IT TO DO. WE HAVE BEEN ABLE TO CREATE CUSTOM RULES THAT BLOCK OUR USERS OR EXTERNAL USERS FROM SENDING ANY KIND OF SOCIAL SECURITY NUMBERS OR CREDIT CARD NUMBERS THROUGH OUR MAIL SYSTEM. THIS WAS A BIG WIN FOR OUR IT DEPARTMENT AND IT FILLS A MAJOR GAP IN OUR SECURITY PLAN, ALONG WITH KEEPING OUR USERS SAFE."

ABOUT VIPRE
VIPRE is a leading provider of internet security solutions purpose-built to protect businesses, solution providers, and home users from costly and malicious cyber threats. With over twenty years of industry expertise, VIPRE has one of the world's largest threat intelligence clouds, delivering protection against today's most aggressive online threats. Our award-winning portfolio includes comprehensive endpoint and email security, along with threat intelligence for real-time malware analysis. VIPRE delivers easy-to-use, comprehensive layered defence through cloud-based and server security, with mobile interfaces that enable instant threat response.

SECURITY AWARENESS TRAINING
- Train employees to be alert to and aware of online threats
- Email simulations of the latest phishing and Business Email Compromise (BEC) scams
- Periodic testing to measure employee knowledge

EMAIL CLOUD
- Protection from known and emerging email-based threats
- Defends against viruses, malware, spam, bulk mail, phishing, and spoofing with six layers of scanning
- Ransomware and BEC protection

EMAIL ENCRYPTION
- Secure encryption of email sent to any recipient
- Secure web portal for any recipient that does not have end-to-end email encryption

ATTACHMENT SANDBOXING
- All email attachments scanned and tested in an isolated environment away from your network
- Machine-learning model based on the behaviour of millions of observed malware samples over the past 20 years

PHISHING PROTECTION
- Post-delivery weaponised link protection
- Automatically rewrites URLs to verify their authenticity and safety upon user click

DATA LOSS PREVENTION
- Prevent Outlook and OWA autocomplete mistakes such as misaddressed emails and incorrect attachments
- Detect keywords and data patterns such as credit card numbers, bank account details and national insurance numbers inside the email body and attachments
- Confirm external recipients and attachments in outgoing emails

SIMPLIFIED SUPPORT
- Seamless experience for account administrators across products
- One point of contact required for account management, billing and technical assistance
- Customer support available via Help Desk ticketing, phone, and Knowledge Base
